

Tadbik RFID & IoT

Transforming Physical Assets into Connected Intelligence

Who We Are

Tadbik RFID & IoT provides advanced RFID, NFC and Ambient IoT solutions for connected supply chains and intelligent operational environments.

Combining advanced conversion engineering, industrial manufacturing capabilities and smart label expertise, Tadbik develops customized products and technologies designed for logistics, retail, healthcare, industrial and reusable packaging applications.

Our capabilities include RFID and Ambient IoT conversion, smart tag engineering, industrial-scale manufacturing and end-to-end connected solutions – from tag production and infrastructure integration to data visibility and operational intelligence.

As a strategic partner of Wiliot, the global leader in battery-free Ambient IoT technology, Tadbik also manufactures next-generation Ambient IoT tags enabling continuous sensing, visibility and real-time operational awareness.

Our Solutions

Inventory &
Supply Chain
Visibility

Cold Chain &
Condition
Monitoring

Reusable Asset &
RTI Tracking

Authentication &
Brand Protection

Smart Packaging
& Consumer
Engagement

Healthcare &
Patient
Identification

Technologies & Capabilities

Technologies

RFID | UHF | HF | NFC | Ambient IoT | Sensor-Enabled Technologies

Product Formats

RFID Labels | Industrial Tags | Flexible Tags | Wristbands | Dry Inlays | Smart Packaging Components

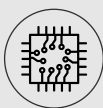

Capabilities

Conversion Engineering | Ambient IoT Tag Manufacturing | Encoding | Serialization | Variable Data Printing | Custom Conversion | Industrial-Scale Manufacturing

Why Tadbik RFID & IoT?

**Advanced
Conversion Expertise**

**Ambient IoT
Manufacturing
Capabilities**

**End-to-End Project
