

Food & Coffee Embossed Aluminum Lids

The Premium Series

Advanced Embossing Technology for Pre-Cut Aluminum Lids

Tadbik specializes in manufacturing high-quality aluminum and PET lids for the food and coffee industries. All products comply with strict international standards and are certified for direct food contact.

Conventional aluminum pre-cut lids include a full-surface functional embossing to ensure smooth separation and application on high-speed packaging lines.

However, full-surface embossing can affect print clarity and compromise brand visibility.

next-generation aluminium Pre-cut lids – the Premium Series

Emboss-in-Register is a precise and customized embossing technique applied to selected areas of the pre-cut lid—preserving graphic integrity while maintaining full functionality.

Key Benefits

- Precise, non-intrusive embossing
- Sharp, high-quality print appearance
- Custom branding with logos or patterns
- Premium shelf presence
